Spare Parts	All	1	• 1 year replacement products or parts only;

Where under this warranty we repair or replace a product or part, the warranty applicable to the repaired or replaced product or part runs from the date of original purchase.

PRODUCT CARE & MAINTENANCE

PRODUCT CARE & MAINTENANCE

- The materials used in our products have been carefully chosen to comply with Australian Standards and Water Efficiency Labelling Standards (WELS) requirements
- Treated with care, the products will ensure many years of service. In order to preserve appearance with minimum effort, we offer the following advice.
- These recommendations are intended to assist you, our customer. They are based on our experience and judgment but must not be regarded as amounting to a legal warranty or liability on our part.

Tapware & Showers & Accessories

- Under no circumstances should tapware be installed using silicone.
- Never use harsh detergents, citrus based cleaners or abrasive cleaners, on any products as these will scratch the surface.
- Where your tapware/showers/accessories remain dry in use, a soft cloth can be used to remove surface dust. Alternatively, a wipe over with warm soapy water is all that is required to maintain the finish in perfect condition for a lifetime of use.
- Don't use cleaning products containing chlorides and halides (e.g. Bromine, Iodine and Fluorine).
- Don't use disinfectant to clean stainless-steel parts and components.
- Don't use hydrochloric acid (HC) for cleaning. This will lead to pitting and stress corrosion cracking (SCC).
- Use of wax-based furniture Cream should be avoided as these can result in a build-up of deposits, which could detract from the appearance.
- Do not use undue pressure when wiping.
- Colour-plated products should always be cleaned with care using a soft dry cloth or a soft cloth with warm soapy water.

Tapware Aerator cleaning

- The cleaning of the Aerator insert must be performed regularly. The frequency depends on the water quality and water borne debris in your area as it is the homeowner's responsibility to keep the Aerator insert clean. We suggest this be performed at a minimum of 6-month intervals. Refer to installation instructions supplied with the product.

Stainless steel sink / laundry tubs

- Routine cleaning with soap, mild detergent or ammonia solutions in warm water, followed by a freshwater rinse is usually adequate for normal soiling. Repeated applications and the occasional use of a nylon scouring pad will often remove heavier soiling.
- Heavier soiling, light staining apply the mildest household abrasive cleaner or paste made from bicarbonate of soda. Wearing gloves use a soft cloth, fine nylon scouring pad or soft bristle brush; rub the surface as softly as possible, using long even strokes in the direction of the polished finish. Avoid using circular motion. Rinse well and wash as per routine cleaning.
- Due to the nature of stainless steel material, it can be easily scratched with normal day to day use. It is difficult to keep the mirror finish without using it. Stainless steel is more rust resistant rather than scratch resistant. To remove light scratches, use suitable fine flexible sanding pads to clean the sink surface. Place the pad on the stainless steel surface and apply force by hand in a straight line motion moving from side to side. (Ensure the pad motion is in the same direction as the grain).

- Don't use cleaning products containing chlorides and halides (e.g. Bromine, Iodine and Fluorine).
- Don't use disinfectant to clean stainless steel parts and components.
- Don't use hydrochloric acid (HC) for cleaning. This will lead to pitting and stress corrosion cracking (SCC).

Toilet

- Vitreous china
 - Use a mild household detergent or warm soapy water and clean with a soft cloth.
- Toilet seats
 - The best method of maintaining the finish while ensuring the cleanliness of toilet seats is simply to wipe them over with a soft cloth such as Selleys "Wonder Cloth" or similar with warm soapy water. This is all that is required.
 - It is important that no abrasive cleaners are used, as these will remove the surface gloss of the product. At regular intervals the tightness of the hinge bolts might be checked, as continual use may cause loosening over time.

Basin

- Everyday care
 - Caring for your ACL Solid Surface product is quick and easy. For day-to-day cleaning, most dirt and grime that may build up on the surface can be removed with a simple wipe using a damp soapy sponge or cloth, followed by a rinse.

Tips to prevent damage to your basin

- The use of harsh chemical products such as acetone, trielin or strong acids will stain the surface of the product and should not be used. Never pour essential oils directly into an empty bath or basin, always add to the water.

Removing stains

- If a stain appears, always start with the cleaning method recommended under 'Everyday Care' first. If the stain is still visible, clean using a damp sponge or cloth and a mild abrasive Cream or paste cleanser (e.g. Jif® or Gumption®) using a light, wide, circular motion. Follow with a rinse. Lightly wipe the surface using a wide circular motion. Take care to rinse the surface thoroughly. This cleaning method should remove most stains that appear on the surface.

TERMS & CONDITIONS

CONTACT

Warranty Conditions

- Should any warranty claim be made and attended to by a ACL authorised Service Agent and that in the opinion of the Service Agent or ACL, the problem was from faulty installation or use of the products in conjunction with products of another manufacturer or from some other cause other than a manufacturing defect of the goods for which ACL is responsible. ACL reserves the right to charge a service fee for each service staff attending the Owner's premises where products have been installed.
- As part of ACL's commitment to continuous improvement, ACL reserves the right to make changes to its Products at any time.
- ACL requires adequate access to products, fittings and fixtures to undertake warranty repairs. ACL will not be responsible for any consequential damage or costs where adequate access to product fitting & fixtures is not accessible.

Consequential Loss

- To the extent permitted by law, ACL will not be liable for any loss or damage to furniture, floor coverings, walls, fixtures or any consequential loss of any kind caused by any defect in the product or components.
- The ACL's obligations under warranty are limited to the repair or replacement of any products which are defective through faulty workmanship or materials at ACL's option.
- ACL will not be liable for any consequential damage or costs where products do not have adequate accessibility.

Warranty Exclusions

1. Failure to provide proof of purchase or equivalent document.
2. If:
 - Products are not installed by a licensed plumber.
 - Products are not installed in accordance with the manufacturer's installation instructions.
 - Products are not installed to relevant National Standards and State Regulations.
 - Water pressures and or temperatures that exceed stated limitations as per the products installation instructions. Note: AS/NZS 3500.1-2003 (Clause 3.3.4) specifies 500kPa maximum water supply pressure at any outlet other than a fire service outlet within a building for new installations.
- Isolation stop taps are not fitted as stated on manufacturer's installation instructions.
- Fitting of non-approved products such as Aerators or flow regulators, and other devices, e.g. Water filters.
- Products used for incorrect applications, non-potable water etc.
- Damage as a result of obstructions due to inadequate flushing of system before use and problems caused by water supply (including silt, corrosion and excess water pressure).
- Failure to regularly clean or replace dirty or blocked outlet Aerator inserts in tapware and/or shower heads etc.
- Damage to finishes by adhesives, sealants etc.
- Damage to finishes which arise from installation or post installation use.
- Failure to follow manufacturers care and cleaning instructions.
- The warranty work is limited to the pre-approved scope of work. Additional work will require authorisation from ACL Company.

- NOTE: It is the installer/consumers responsibility to ensure:
- Product is not damaged prior to installation.
 - They are happy with their purchase.
 - The product has all of its components.
 - Required maintenance is performed.

Product Warranty Contact Details

All ACL Products vary from a minimum 12 month to a lifetime product warranty. Should any of our products not perform to your satisfaction and/or for product specific warranty periods, please contact ACL office on 02-9647 1383 or service@aclcompany.com.au. Our experienced customer service personnel will professionally deal with your enquiry.

How to make a Warranty Claim

- To make a warranty claim, the following documentation must be emailed, posted or faxed to ACL company (contact details listed below):
- Name/model of product and photographs of the issue (if available);
 - Proof of purchase and /or Proof of installation (by a licensed plumber);
 - Your contact details: name, address and best contact phone number;
 - Handover documentation for new homes;

ACL Company PTY LTD contact details are as follows:
101 Carnarvon St, Silverwater NSW 2128
Phone: 02-9647 1383
Fax: 02-9648 1338
Email: service@aclcompany.com.au
